US\$ 5.9 M

The Community's life back in 2008

In 2006, **17.6%** of children were dropping out from primary school

Only **2.5%** of children continued to secondary level after completing primary school

In 2012, 65% of children in grade 6 could not read and write

Only **15%** of population used toilets.

60% of the children were likely to be stunted

In 2018, **82.4%** of parents or caregivers used physical punishment as a means of disciplining their children

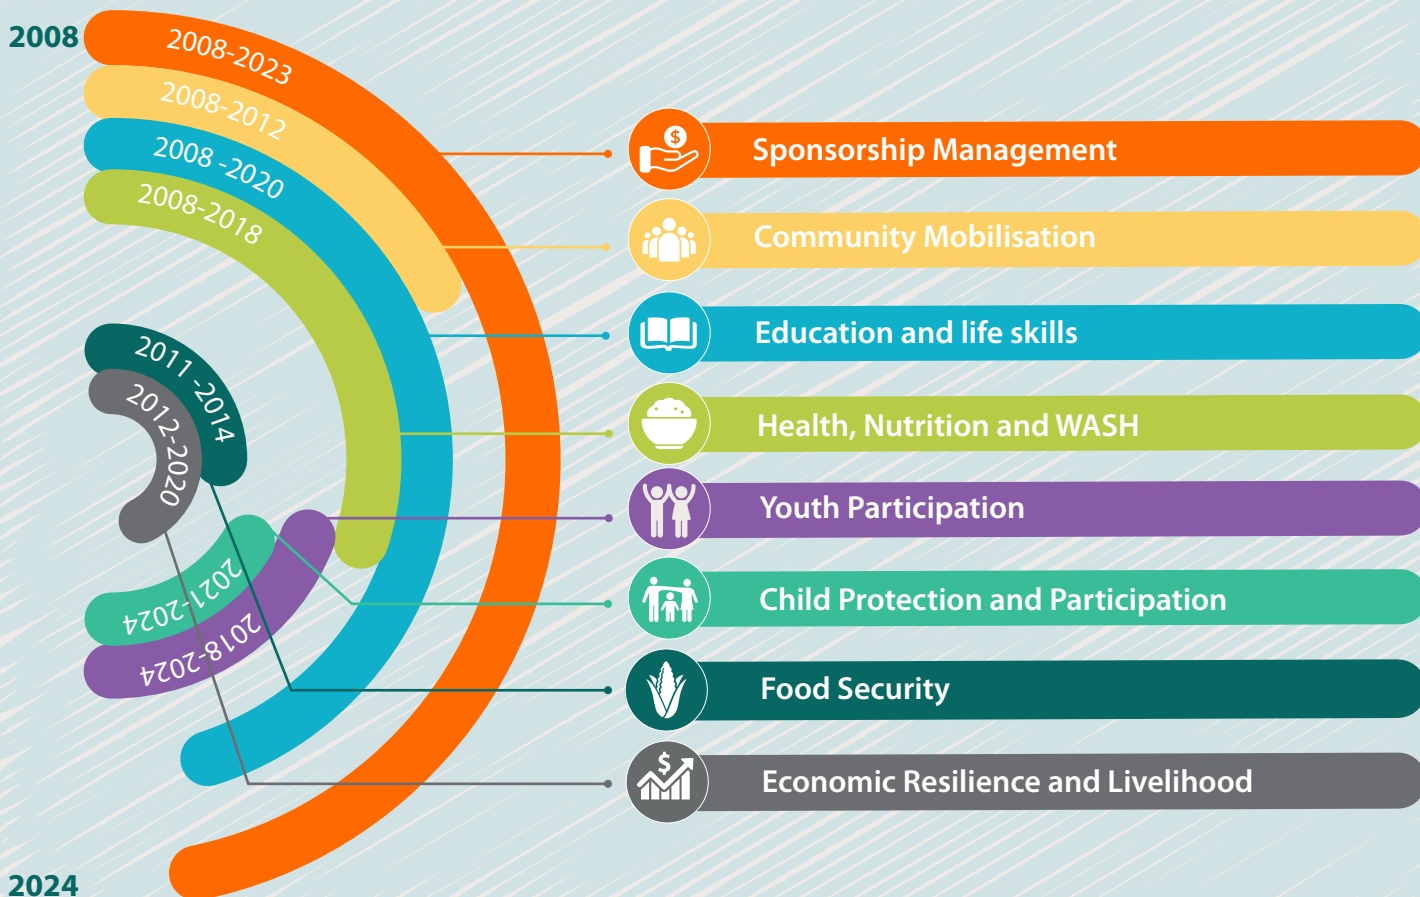

17.8% of community members reported an abuse, exploitation, and violence against children to a local child protection mechanism

Programme Goal

Working together through community engagement and local level development to ensure all children, especially the most vulnerable ones receive quality primary education, live in a healthy environment, and are cared for and protected.

Development Pathway

Education

Reading with Comprehension of children in grade 1-6

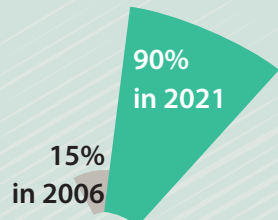

Dropout rate

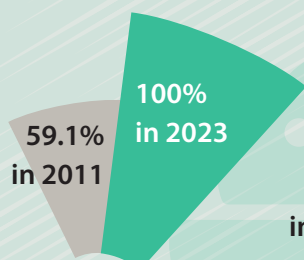

Proportion of parents and caregivers who promote learning for children (aged 6-11)

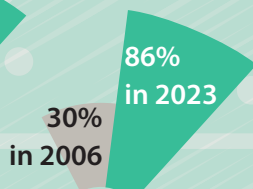

Health and Nutrition

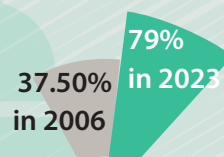

Access to toilets

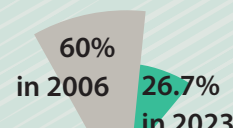

Births assisted by trained health centre staff

Community people are food secure

Households access clean water (drinking water)

Prevalence of stunting in children under five years old

"We had World Vision as a strong partner in our community, which has led to improvements in various sectors such as health, education, child protection, commune administration, and citizen participation. World Vision has especially enhanced the knowledge of our community members and focused attention on women and children. I would like to thank World Vision for supporting our village, commune, and community transformation and development," Sophy, Commune Council in Thmey Commune.

"I am very satisfied with all of World Vision's project implementations in Kuleaen, especially the education programme, which has significantly contributed to the education sector in Kuleaen district. The programme had positive impacts on school environment, health, library resources, technical pedagogy, and learning, leading to improved life skills, motivation, experience, and reading abilities of students. These factors have contributed to a decrease in school dropout rates," Sokhet, Kuleaen Prom Tep Primary School Teacher.
