

WATER, SANITATION AND HYGIENE

WASH

October 2018 - September 2023

PROGRAMME BRIEF

- Our Water, Sanitation and Hygiene (WASH) programme in Cambodia started in 2007 and is part of our integrated nutrition approach to achieve sustainable well-being for 5 million girls and boys in Cambodia.
- Supported by the World Food Programme, UNICEF, Procter & Gamble (P&G), MOFA Japan and World Vision offices in Korea, Taiwan and the United States of America.

PROGRAMME GOAL

Improved child well-being by increasing the number of children who are healthy and well-nourished with access to safe water, sanitation and hygiene in financially stable homes.

OUTCOMES

Improved Water, Sanitation and Hygiene behaviours through behaviour change programmes and appropriate WASH infrastructures

OUTPUTS:

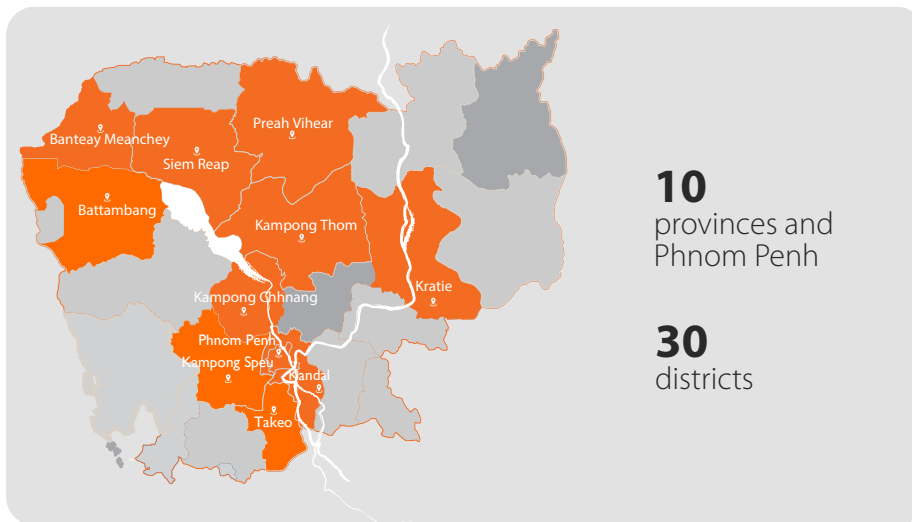

1. Health Centres (HC) have appropriate WASH infrastructure for clean deliveries to prevent the spread of infections
2. Households have access to latrines for defecation
3. Increased access to handwashing facilities for mothers and caregivers
4. Community members have access to an improved source of drinking water and treat water before consumption
5. WASH during emergencies is strengthened
6. Strengthen and enforce the WASH policies

SUSTAINABLE DEVELOPMENT GOALS

KEY ACHIEVEMENTS October 2018 - September 2023

Water supply, Sanitation & Hygiene services were significantly improved during the last 5 years as a result of the cooperation with Provincial Department of Rural Developments (PDRD), and local partners.
